

Comment from Government Member Steph Tatham, Office of Management and Budget, on  
*Artificial Intelligence in Retrospective Review of Agency Rules*  
June 9, 2023

Regarding Recommendation 8, line 82, replace “should provide guidance” with “should consider providing guidance.” We appreciate this suggestion and the helpful empirical research supporting this draft Recommendation and will consider it.

More immediately, OMB is working to implement the President’s directive in Executive Order 14094 Section 2(d) to consider guidance or tools to modernize the notice-and-comment process, including to address mass, computer-generated (such as those generated through artificial intelligence), or fraudulent comments. We appreciate the Conference’s early leadership in studying and calling attention to these important issues in Recommendation 2021-1.
